Hi Charles, I've called you several times this morning to talk to you about proposition 32 here in California. It will be a big deal in California but I think also for the nation if we get this prop passed. We think to get over the top we need to get to a target of 65 million. We are at 58 million now. I have committed an additional 2 million today making my total commitment of 7 million. It would be great if you could support the final effort with several million.

I must tell you that Sean Noble from your group has been immensely helpful in our efforts. Thanks for any consideration. I look forward to seeing you on a golf course – probably after the election.
Regards [REDACTED]
